## NETWORKED EDUCATION

While students across the province are on an extended break due to COVID-19, & Schools across the globe are finding ways to come up with Ideas.

**Thanks to Narayana** Educational Institutions who have Introduced an e-Learning program with a punch line that stands true **“At Narayana Learning Never Stops”**. This Brilliant one of a

## Parents, don't sugarcoat coronavirus – children must know the truth

As the world heads towards a **coronavirus** pandemic, mass panic is setting in. With 24-hour **news** reporting continually on the rising number of cases, ascertaining exactly how worried we should be, has become impossible – particularly for **children**.

Firstly, we must be as honest as we can. I've heard of some schools telling children not to talk about coronavirus for fear of spreading panic. This is utterly misguided: without the facts, children will fill in the gaps themselves, often spreading misinformation, such as about how the virus can be transmitted or who may or may not have it.

Importantly, being honest doesn't mean focusing on the negative, as the **media** tends to. The death toll is rising, as are the number of cases – but these are still low figures in context of the population. How about looking at the number of people who have recovered from the virus and the number of people who will only get very mild symptoms.

kind initiative has brought smiles to Children studying with **Narayana e-Techno Schools**, at the same time the Parents have also found a sigh of relief due to the pandemic the children are away from schools but were getting more close to Mobiles, Games & Tv. With the help of this Networked Studies, Children are busy with daily Online lectures and Teachers keeping a Close eye on them.

## How can we save girl children in India?

**Bhimrao Ramji Ambedkar**, the architect of the Constitution of India has said, "I measure the progress of a community by the degree of progress which women have achieved." A country that empowers women empowers every individual! We have to start with protecting the girl child, ensuring that her birth is greeted with joy and she receives all the care and love needed to grow to her full potential. As a woman, we need to work to ensure that she gets every opportunity to realise her potential. By celebrating, protecting and educating the girl child, we empower her. By empowering our daughters we empower their communities which means empowering the nation!

**The Narayana Group** is one of Asia's largest educational conglomerates where approximately 40,000 teaching and non-teaching faculty provide world class education for more than 4,00,000 students. Spread across 13 states in India, the

**NARAYANA e-Techno , Ulhasnagar,Mumbai**

Narayana family is home to a flourishing academia with 300 schools, 300 junior colleges and 8 professional colleges. They also run full fledged institutes for civil services, coaching centres and correspondence to address the vocational goals of career-oriented students.

Advice : Based on available evidence, children do not appear to be at higher risk for COVID-19 than adults. While some children and infants have been sick with COVID-19, adults make up most of the known cases to date. Wash Hands regularly, stay at home.
